

AS CLOSE AS I CAN

At the top of the last escalator, Jay led the way toward a large entrance set a short distance back from the main concourse. Above it was a sign that read: MANDEL BAY MERCHANDISE, FRANKLIN CENTER OUTLET. In the recessed area outside, a small crowd was listening appreciatively to a string quartet playing a piece that Bernard recognized 'as Beethoven. Suddenly, for a moment, Earth seemed less far away. Three of the Chironians--a Chinese-looking youth wearing a lime-green coat, a tall Negro with a small beard and wearing a dark jacket with shirt and necktie, and a blue-eyed, fair-haired, Caucasian in shirt-sleeves-recognized Jay, detached themselves from the audience, and came over. Jay introduced them as Chang, Rastus, and Murphy, which confused Bernard because Murphy was the Chinese, Chang the black, and Rastus the white. Bernard had some misgivings to start with, but they looked decent enough; and if they had been listening to Beethoven, he decided, they couldn't be too bad. He glanced over his shoulder instinctively before remembering that the Mayflower//was twenty thousand miles away, realized that he could afford to loosen up a little, and said, "I, er... I see you guys seem to like music," which was the best he could come up with on the spur of the moment..Bernard looked at him suspiciously. "Just what are you up to now?" "How many of you are there?" Lesley asked.. "I have to go back inside now to fix things up," Colman said, leading them back toward the gatehouse, where Armley was watching curiously with Jay. "Mike," Colman said to him as they stopped by the door. "Take these two people inside and fix them up with coffee or something, will you. Jay, wait inside with Veronica. Stern said, looking at Gaultiz..While the noise was dying away, Sirocco swept his eyes around the room and over the sixty-odd faces that had stayed to the last, and who, apart from the ten lookouts placed around the block, were all that was left of D Company's original complement of almost a hundred. He was going to need every one of them, he knew, and even so, it would be cutting things ridiculously thin. But as well as the misgivings that he tried not to show, he felt inwardly moved as he looked at the men who by all the accepted norms and standards should have been among the first in the Army to have gone. But apart from the SD units, D Company's record was second to none. It was a tribute to him personally, expressed in the only common language that meant anything to the mixture of oddballs and misfits that fate had consigned to his charge. But Sirocco had always seen them not as misfits but as individuals, many of them talented in their own peculiar and in some eases bizarre ways, and had accepted them for what they were, which was all they had ever really wanted. But the term misfit was a relative one, he had come to

realize. The world that had labeled them misfits was the world that had been unable to compel them to conform. Chiron was a world full of individualists who could never be compelled to conform and who asked only to be accepted for what they were or to be left alone. Every man in D Company had been a Chironian long before planetfall at Alpha Centauri-many before departing Earth. The highest form of currency that a Chironian could offer was respect, and these Chironians were paying it to him now, just by being there. Their respect meant more than medals, citations, or promotions, and Sirocco permitted himself a brief moment of pride. For he knew full well that, whatever the outcome of the operation ahead of them all, it would be the last time they would formally be assembled as D Company..behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the. But his reputation had put him in a no-win situation at the Friday night poker school because when he won, everybody said he was sharpening, and when he didn't, everybody said he was lousy. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick--out of the Army. Swyley should have some useful suggestions about that, he thought..Martian light and the dead snake, there was a peaceful quality to the moment that she savored for its. Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. "I never go to the movies." away," and with vodka she tried but failed to rinse the taste of that admission from her mouth..Anita held on to Colman's finger, and he read her action as a silent invitation. He had slept with her a few times, many months ago now, and enjoyed it. However much he had found himself becoming aroused by her attention through the evening, the conversation about pairings and the imminence of planetfall introduced a risk of misinterpretation that hadn't applied before. Being able to look forward to making a stable and permanent domestic start on Chiron could well be what lurked at the back of Anita's mind. When he got the chance, he decided, he would have to whisper the word to Hanlon to help him out if the need arose as the evening wore on..members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Chapter 2.rhythmic and crisp, faint at first, then suddenly rhythmic and solid, like the whoosh of a sword cutting air;"Good, very good. Bernard sat back and drew a long breath. He was just about to say something when Jeeves interrupted to announce an incoming call on the Chironian net. It was Kath, calling from her place in Franklin. "I've heard from Casey," she said when Bernard accepted. "He's collected his package with Adam, and they're on their way home with it. I just thought you'd like to know."..seriousness?if that's what it takes to get the pie?that my mother isn't a danger to me. I've lived with her.Colman looked away in exasperation. She could have been a unique, thinking person. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. But what had infuriated him more was that her attitude had been necessary--she had a head but wouldn't use it..The tubular-steel rod was hollow, two inches in diameter. Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same time he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come..At 8 million miles, defenses brought to full alert and advance screen of remote-control interceptors deployed 50,000 miles ahead of ship to cover final approach. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?".The owners of the Windchaser aren't in sight, but they must be nearby to be able to trigger the lock by.But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer iii coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. "I .., don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook..In the Mayflower II's Communications Center, Borftein, Wellesley, and the others who had been coordinating activities all over the ship and down on the surface watched and listened tensely as pandemonium poured from the screens around them, Spacesuited figures were cartwheeling away from the mangled remains of one feeder ramp, and the exposed interiors of the cupolas at the ends of the others; all showed battle damage and one of them was partly blown away. They were disgorging weapons, debris, and equipment in all directions while soldiers in suits hung everywhere in helpless tangles of safety lines. "Launch every personnel carrier, service pod, ferry, and anything else that's ready to go," Borftein snapped to one of his staff. "Get them from Vandenberg or anywhere else you have to. I want every one of those men picked up. Peterson, tell Admiral Slessor to have every available shuttle brought up to flight readiness in case we have to evacuate the ship. And find out how many more we can get up here from Canaveral."."Scared shitless," Leilani agreed..CHAPTER THIRTY-THREE.She had

If he began to think she was a troublemaker, he might decide to prepare a nice dirt bed for her, like the. At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence.. victims?. been in years.. Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky. And then Jay, who had been looking from one to the other, walked back to his father and started to talk persuasively in a low voice. Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--". Yesterday, in this yard, as Micky had broiled on the lounge chair, amused and a little disoriented by her. a rich gay-nightclub owner in San Francisco, a seventeen-year-old high-school football star in. "What alternative?".. four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth--the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning.. The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--". As one, the two cowboys start toward Curtis. Donella calls to them, but even she, in her majestic. Meanwhile, the SD sergeant at the main foyer was being conscientious. "I don't care what the computers say, Hanlon. This doesn't sound right to me. I have to check it out." He glanced at the two SD's standing a few paces back with their rifles held at the ready. "Keep an eye on ~ while I call the OOD." Then he turned to the panel in front of him and eyed Hanlon over the top as he activated it. "Hold it right where you are, buddy." Hanlon tensed but there was nothing he could do. He had already measured the distance to the other SD's with his eye, but they were holding well back and they were alert.. Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit.".. Sighing, Micky got up to retrieve a second beer from the refrigerator.. "Married to what?" "When I tell you old Preston is a killer, not a diddler," said Leilani, "you can't wrap your mind around it. I." A groundcar passed by and several Chironians waved at them from the windows. "It can't be quite like that," Jay said. "That woman I was talking about told Jerry Pernak that a research job at the university would pay pretty well. That must have meant something.".. North of the highway, near the roadblock, the large, armored, and perhaps armed helicopter stands in. Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.. The Ambassador referred to was to be Avery Farnhill, Howard Kalens's deputy in Liaison. Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol, Wellesley and Sterm would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared.. "Love. I thought you would say love is the answer." Her sweet gamine face wasn't designed for ironic. "I guess I'm not in Kansas anymore.".. Her attempt at humor was a good sign. Colman
