"We don't intend to let it happen," Kath said. "So everyone becomes a law unto himself," Merrick concluded, clouded toward a more troubled shade of blue. "I made no mention of taking over anything. I'm merely saying we should be sufficiently familiar with their operations in be able to guarantee service if we are required to. Now that we've had an opportunity to look at Post Norday and a few other installations, I am reasonably confident we could manage them. I didn't want to take up too much of everybody's time before, but since the say to make him leave. More likely, THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area. Worse: If he's in custody, those vicious hunters who killed his family? and the Hammond family, authorities. He shoves the currency into his pockets once more. "He's just playing on emotion, Jean. I had it on down here for a few minutes but couldn't stand it. All he's interested in is scoring a few points against Wellesley and stopping a run to Lechat. And all that stuff about the Chironians claiming everything is theirs-it's pure garbage! I mean, it couldn't be further from the truth, could it, but nobody stops to think." He frowned to himself for a moment. It was true that he hadn't been at The Two Moons, but he had called Colman early that morning and gotten what seemed like an honest account. But with Jean acting the way she was, he didn't want to mention that. "Anyhow, the facts about the shooting are on record," he said. "All you have to do is ask Jeeves." "Why do a lot of cops from back then like ZZ Top?" he wondered. Trying to regain control of his emotions, but still blubbing a little, he says, "I don't know why I offended." "We're listening," Otto replied tonelessly. CHAPTER TWENTY-SIX. that might encompass. "You know, walking around the park in a costume, having your photo taken with people. I wanted to be. you, ma'am. My mother always said it's best to speak your heart, which is the only thing I did." Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." "To herself, for sure," Leilani agreed. "Not really to others." Affixed to the door is a stainless-steel plaque with laser-cut letters. At the end of 1979, Hogan opted to write full-time. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." Getting the dog through the window won't be easy, if it comes to that, so it better not come to that. The Chironians were also experimenting with beaming' power in the form of microwaves up to satellites from Port Norday, to be relayed around the planet and redirected to the surface wherever needed. This project was in an early phase and was purely research; if it proved successful, a full-scale ground-station to exploit the technique on a production basis would be built elsewhere. They entered the capsule pickup point and came

out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY..custom-designed carrying cases, each as large as a Samsonite two-suiter, and both bags now stood. The plasma emerged from this primary process with sufficient residual energy to provide high-quality heat for supplying a hydrogen-extraction plant, where seawater was "cracked" thermally to yield bases for a whole range of liquid synthetic fuels, a primary-metals extraction and processing sub complex, a chemical-manufacturing sub complex, and a desalination plant which was still not operational, but anticipated large-scale irrigation projects farther inland in years to come..Howard brought a hand up to his chin sad rubbed it dubiously for a few seconds. "Mmm . . . Stern. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Stern could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." was under surveillance. No one followed him, not even at a distance..These people form a gauntlet of sorts through which Curtis and Old Yeller must pass. Twisting, dodging, "Judge Fulmire." Lechat frowned and tapped in a code to reconnect. The unit returned a "number unobtainable" mnemonic. He rattled in another code to alert a communications operator. The same thing happened. "The regular members who had been absent had returned for the occasion, and the only seats left vacant were those of the Deputy Mission Director, the Director of Liaison, the Commanding General Special Duty Force, and two others who had chosen to throw in their lot with Stern. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..Utah night, four feet above the highway.."Let's not start name-calling." Lesley accepted automatically and found himself looking at the features of Colonel Oordsen, one of Stormbel's staff, looking grim faced and determined, but visibly shaken. "Activate the intruder defenses, close the inner and outer locks, and have the guard stand to, Major," he ordered. "Any attempted entry from the Spindle before the locks are closed is to be opposed with maximum force. Report back to me as soon as the bulkhead has been secured, and in any case not later than in five minutes. Is that understood?" When they arrived at Kath's Franklin apartment with Adam and his "wife" Barbara, who had collected them at the border, Veronica was waiting with Kath and Casey. Colman already knew everybody, and while he and Kath were introducing Bernard and Lechat to those they hadn't met previously, Veronica and Celia greeted each other with hugs and a few more tears from Celia, style and sexy allure of a robot hunter who had been constructed in a laboratory in the future and sent. Fallows left the monitor room, crossed the floor of the Drive Control Subcenter, and exited through sliding double doors into a brightly lit corridor. An elevator took him up two levels to another corridor, and minutes later he was being shown into an office that opened onto one side of the Engineering Command Deck. Inside, Leighton Merrick, the Assistant Deputy Director of Engineering, was contemplating something on one of the reference screens built into the panel angled across the left corner of the desk at which he was sitting..deserve it." "Daskrend,' Murphy supplied. "Oh, they're a kind of wolf but bigger, and they've got poison fangs. But they're pretty dumb and no big deal to handle. You sometimes find them higher up in the foothills across the Medichironian, but mostly they live on the other side of the Barrier Range." "Well, of course it does, sweetheart. What would the world be like without toilets?" "Tell it to Merrick," Fallows said, making an effort ~lot to show the disapproval that he felt. Talking that way betrayed a sloppy attitude toward engineering. Even if they had only three weeks to go, there would still be no excuse not to fix a piece of equipment that needed fixing. The risk of catastrophic failure might have been vanishingly small, but it was present. Good practice lay with reducing possibilities like that to zero. He considered himself a competent engineer, and that meant being meticulous. Walters had a habit of being lax about some things--small things, admittedly, but laxness was still laxness. To be ranked equally irked Fallows. "Log change of watch duty, Horace," he said to the grille on the console. "Officer Fallows. Of course, this is a little cottage on wheels, not a castle. "But surely they wouldn't just hit it without any warning to anyone—not with all those people still up there," he insisted. "Wouldn't they say something first.. let Sterm know what he's up against?" "Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie.. Micky and Mrs. D tried to delay Leilani's departure. They were afraid for her. They worried that he'll have a lifetime for anguish, loss, and loneliness.. As a postgraduate biology student at the University of Michigan, her home state, she had once had ambitions to specialize in biochemistry and the genetics pf primitive life-forms. She had hoped that such studies would bring her closer to comprehending how inanimate matter had organized itself to a complexity capable of manifesting life, and she rationalized it outwardly by telling herself that her knowledge would contribute to feeding the exploding population of the new America.
