"I can't say I have. I always mean to, but you know how it is. It's the same with the Statue of Liberty. It's always there, so you never get around to it". Standing just outside the airlock was Mary Lang. She turned as they came out, and did not seem surprised. They are stimulated, in a variety of ways depending on subtle factors, with the result that different cells in your brain are stimulated. When Amos came up to the ship with the mirror under his arm, he called, "Here's your mirror. Call him Smith. He was the president of a company that bore his name and which held more than a hundred patents in the scientific instrument field. He was sixty, a widower. His only daughter and her husband had been killed in a plane crash in 1978. He had a partner who handled the business operations now; Smith spent most of his time in his own lab. In the spring of 1990 he was working on an image-intensification device that was puzzling because it was too good. He had it on his bench now, aimed at a deep shadow box across the room; at the back of the box was a card ruled with black, green, red and blue lines. The only source of illumination was a single ten-watt bulb hung behind the shadow box; the light reflected from the card did not even register on his meter, and yet the image in the screen of his device was sharp and bright. When he varied the inputs to the components in a certain way, the bright image vanished and was replaced by shadows, like the ghost of another image. He had monitored every television channel, had shielded the device against radio frequencies, and the ghosts remained. Increasing the illumination did not make them clearer. They were vaguely rectilinear shapes without any coherent pattern. Occasionally a moving blur traveled slowly across them. "Jesus," says the tech- "You ought to be performing. Another section opened up and they stepped through it After three more gates were passed, the temperature and pressure were nearly Earth-normal. And they were standing beside a small oriental woman with skin tanned almost black. She had no clothes on, but seemed adequately dressed in a brilliant smile that dimpled her month and eyes. Her hair was streaked with gray. She would be? Singh stopped to consider? forty-one years old. "I do," he protested. But, clearly, he had just failed a major test. With a sigh of weariness and a triumphant smile, the woman rotated her sofa around one hundred and eighty degrees and drove off in the direction of the couple chained together on the blue settee. You are six, almost seven, and you are being allowed to use the big viewer for the first time. You are. Afterward, Ike and I stopped in The Fig Leaf for a couple of beers. Ike seemed worried. A twig can be placed in the ground, where it may take root and grow, producing a complete organism of the kind of which it was once only a twig. Or the twig can be grafted to the branch of another tree (of a different variety even), where it can grow and flourish. In either case, it is

an organism with a single parent, and sex has had nothing to do with its making. It is because human beings first encountered this asexual form of reproduction, hi connection with fruit trees probably, that such a one-parent organism of non-sexual origin is called a "twig"; that is, "clone." "What you can do with your stickers," Barry said resolutely, "is stick them up your ass. Your asses, rather." Things did settle down, as Lang had known they would. They entered their second week alone in virtually the same position they had started: no romantic entanglements firmly established. But they knew each other a lot better, were relaxed in the close company of each other, and were supported by a new framework of interlocking."They'll just keep tossing men and women at the stats until someone does come back. Four black bearers had appeared, bearing a long black palanquin. They proceeded to set it down directly before the gate. I knew from its length that here was no ordinary wealthy merchant, but I was unprepared for the personage who presently stepped out and stood gazing at the Project with black blazing eyes. Those eyes burned right through Ike and Eli and Dan and me, as though we weren't even there, then swept upward, absorbing the entire Project with a single glance. It dawned on me finally, as I took in the small gold crown nestled in the black ringleted hair, the flared eyebrows, the fierce nostrils and the defiant jaw, that I was looking at the King.
