They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." "Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom." Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects." way or another by her tenth birthday, she wouldn't be in danger until the eve of that anniversary; by then, "Detail... halt!". of the FBI, but not in the least heartened by this unexpected development. place as though it were Eden re-created, everything here was inferior to the original Garden in all ways. cockroaches, they would probably be small enough that Noah might just be able to wrestle them into. Although Curtis can't prick his ears? one of the drawbacks of being Curtis Hammond instead of being Maddoc's twelfth victim?. Jean raised her hands in an imploring gesture. "Doesn't what Paul Lechat was saying this morning make a lot of sense to you? Isn't it the only way? Well, he's going to need help to do it. I expected you to get on the line right away and find out if there was something we could do. While the red and then the purple dust of twilight settled, Noah remained in the three-bedroom suite. She'd been a frightened, angry, and humiliated girl, panicked into flight. She would not ever be that. "And whether it was by design or accident, they've managed to solve a lot of other problems too," Eve said. "Take crime for instance. Theft and greed are impossible, because how can you steal another man's competence? Oh, you could try and fake it, I suppose, but you wouldn't last long with people as discerning as Chironians. They can see through a charlatan as quickly as we can spot ourselves being shortchanged. In fact to 'them that's just what it is. They have their violent moments, sure, but nothing as bad as what's coming in from Africa on the beam right now, or what happened in 2021. But it never turns into a really big problem. There's no motivation for anyone to rally round a would-be Napoleon. He wouldn't have anything to offer that anybody needs." Returning the untouched forkful of pasta salad to her plate, Leilani looked to Micky for an explanation. was under surveillance. No one followed him, not even at a distance. The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. Driscoll and Sirocco remained with Wellington in the corridor. Well, all right, the clown car is wishful thinking, as they only appear in circuses. In fact, it's certain to be. Colman stared at Celia for a few seconds longer. He still didn't know why Celia should have been so anxious to get away from Sterm or why she should have been in any danger. Life couldn't have been much fun with somebody like Howard, he could see, so the thought of her gravitating toward a strong, protective figure like Sterm wasn't so strange. And it didn't seem so unnatural that she should have stayed near Sterm after Howard was killed. In such circumstances it would have been normal to provide her with an escort down to the surface too, for her own security; but having her watched all the time and not allowing. Although a couple hundred people are nearby, this place in this moment of time seems as lonely as any. rants of anger,

Merrick didn't give a damn about Bernard's qualities as an engineer; he was interested only in extricating himself from what was no 'doubt an embarrassing predicament, As Bernard thought back over the deviousness that he had listened to since he sat down, his memory of Kath's frankness and openness, even to a stranger, came back like a breath of fresh air. "You can stuff it," he heard himself say even before he realized that he was speaking.. Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. "That's. A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern. The room is small. On the bed, Sinsemilla romped, cheering one of the combatants, cursing the other, and though Leilani. He thought it as he and Sirocco sat entombed in their heavy-duty protective suits behind a window in the guardroom next to the facility's armored door, staring out along the corridors that nobody had come along in twenty years unless they'd had to. Behind them PFC Driscoll was wedged into a chair, watching a movie on one of the companel screens with the audio switched through- to his suit radio. Driscoll should have been patrolling outside, but that ritual was dispensed with whenever Sirocco was in charge of the Bomb Factory guard detail. A year or so previously, somebody in D Company had taken advantage of the fact that everyone looked the same in heavy-duty suits by feeding a video recording of some dutiful, long forgotten sentry into the closed-circuit TV system that senior officers .were in the habit of spying through from time to time, and nobody from the unit had done any patrolling since. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. "But I don't know if something like that would be possible." "I hope you're not expecting an answer," Hanlon said. "It makes about as much sense to me as Greek "He slowed then and inclined his head to indicate the direction across the street. "Now, there's the fella you should be asking," he suggested.. "She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. "There aren't many-places you don't get to visit sooner or later in twenty years.. "You'd better believe it," Lechat promised.. Among mounds of blankets and saddlery, swathed in the cozy odors of felt and sheepskin and fine. "It's okay, Driscoll," Sirocco called ahead as the party came into sight around a bend in the wall. "Forget the pantomime. We're back in the Bomb Factory." Driscoll relaxed his pose and sent a puzzled look along the corridor.. "I know," Kath told him. Standing in profile to. Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. He rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation

for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Stern said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?" Old Sinsemilla would never intentionally kill herself. She ate no red meat, restricted her smoking solely to. After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow." "Spike it with what, dear?" THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion. west to action in the east. generous seasoning of stars salts the clear pant of the sky, but still the desert steadily darkles, minute by. He swallowed hard and shook his head. "I have to stay here. This conversation is enough to get me shot as it is." Ci shrugged but seemed content not to make any more of it. Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else." "What does a Chironian computer print when you attempt illegal access?" one of them asked Colman when they had got into their joke repertoires. This may sound crazy, but I never really met her before tonight." He has found hope. Hope that he will survive. Hope that he will discover a place where he belongs and. Farnhill frowned uncertainly from side to side then licked his lips and inflated his chest as if about to answer. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. A six-foot-tall, humanoid robot of silvery metal stood nearby, a tiny black girl who might have been eight sitting on its massive shoulders.
