

STITUTION OF COMMERCIAL FERTILIZERS FOR MANURE IN VEGETABLE PRODU

"Oh, that locomotive!" lean looked at lay. "Are you working on it again?" Lechat didn't respond immediately. Eve Verity elaborated. "For over three centuries we've been struggling to reconcile old ideas about the distribution of wealth with the new impact of high technology. The problem has always been that traditional conditioning processes for persuading people to accept the inevitability of finite resources get passed on from generation to generation as unquestioned conventional wisdoms until they start to look like absolute truths. Wealth was always something that had to be competed and fought for. When slaves and territory went out of style with technology becoming the main source of wealth, we continued to fight over it in the same way we'd always fought over everything else, and everybody thought that was inevitable and natural. They couldn't separate the old theories from the new facts." Eve took a sip from her wineglass, then continued, "But the Chironians never grew up with any of that brainwashing. They made a clean start with science and advanced technologies all around them and taken for granted, and they understand that new technologies create new resources ...without limit." The digital readout on the radio, powered by the car's battery, emits a glow, but the faint radiance is. The only thing trickier than an amateur using a psychologist's techniques was an amateur trying to. Before Leilani, revelation had been impossible. Now it was merely excruciating. "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." crop of fiery red hair snares Curtis by the shirt, nearly causing him to skid off his feet. "Hey, hey, hey!" "How many of you are there?" Lesley asked. "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh?". Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. Bernard called out. "At your service," a voice replied from the direction of the screen. "I answer to Jeeves, unless you want to {sake it something different." The voice changed to that of a girl speaking with a distinctive French accent. "Une petite francaise, possiblement?" Then it switched to a guttural male--"Karl, ze Bavarian butler, maybe?"--to smooth tones---"Or perhaps something frightfully English might meet more with your approval?"--and finally back to its original American. The Mayflower II, when at last it began growing and taking shape in lunar orbit year by year, became the tangible symbol of that quest. that she consumed, when she was balancing just so on the tightrope between hyperactivity and drooling. "I have listened to and considered the objections, but I think the prevailing view of most of us has made itself clear," Wellesley said. "The policy that we have attempted has not only failed to achieve its goals and shown itself incapable of achieving them, but it has culminated in an act which we must accept as a first manifestation of a threat that affects all of us here as potential future targets, and in the alienation of our own population to the point where many find themselves not unsympathetic to those for whom that threat speaks. Any government seeking a continuance of such a policy

"But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?".Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her."So, Mrs. D, how did your wires get scrambled?" Leilani asked, tapping her head.. "Why's it so important to be better than somebody?".hope other than his wits and courage.. "Close up ranks," Sirocco said, and the guard detail shuffled forward to crush up close behind Sirocco, Colman, and Hanlon to make room for the officers and the diplomats to move up behind. Sirocco looked at the Dispatching Officer and nodded. "Open outer hatch." Sterm studied his fingers for a moment and then looked ' up. "Where direct military intervention is impractical or undesirable, control is usually exercised by restricting and controlling the distribution of wealth," he said slowly. "Here, the traditional methods of accomplishing that would be difficult, if not impossible, to apply since the term cannot be applied with its usual meaning. This society must have its pressure points, nevertheless. It is an advanced, high technology society; ultimately its wealth must derive from its technical and industrial resources. That is where we should look for its vulnerable spots." .So with medical-kit alcohol, she dissolved and swabbed away the crusted blood in the punctures. She. Clump, clump, clump, clump. His train of thought was derailed by the sound of steady tramping approaching from his left--not the direction in which the detail had departed, which shouldn't have been returning by this route anyway, but the opposite one. Besides, it didn't sound like multiple pairs of regulation Army feet; it sounded like one pair, but header and more metallic. And along with it came the sound of two children's voices, whispering and furtive, and punctuated with giggles.. "I have no idea," Colman said, grinning. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail. Is that the future that you would wish upon Chiron?". "He ought to be given a

While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon." Veronica came back into the room and began picking up Mrs. Crayford's boxes. "It's all right. You stay there, Celia. I can manage." She saw the expression on Celia's face and smiled. Her voice dropped to a whisper. Twenty-four ha4 escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them.
