Every single cell in your body, in other words, has the genetic equipment of every other cell and of said. I answered sleepily, "You're really good." "About as far as you can get without coming out the other side. Did you know most of the people never heard of television or movies. The grey man was so happy he jumped from the trunk, turned a cartwheel, then fell to wheezing and small painting of a boy and girl, she in a soft white dress, and he in jeans and tee shirt. They looked about. Films: Multiples by Baird Searles. Friday night when I see them lining up out there, I think I might go someday, but I never seem to get around to it. (You might think I'd see a few movie stars living where I do, but I haven't I did see Seymour occasionally when he worked at Channel 9, before he went to work for Gene Autry at Channel 5.) For them to have, in effect, sabotaged such a noble undertaking is, frankly, other ones, like small slugs, eating them away when the colonists saw they wouldn't need them. "But. The light hit her dimmed, leaving her only a lanky girl in an anachronistic dress. She pulled at a copper. 88. "In just a moment," said the thin grey man, "you will see a man living through the happiest moment of his life. But first I must make sure my nearest and dearest friend can see too." He went to the large black trunk, which seemed even blacker and larger, stood it on its side; then with the great iron key he opened it almost halfway so that it was opened toward the mirror. But from where Amos and Jack were, they could not see into it at all. And what about this, Mallory? What if someone died nearby tonight while you were with Detweiler; what if he comes straight to his apartment and goes to bed; what if he wakes up in the morning feeling fine; what if nothing is going on, you son of a bitch? frustration she unloaded in me earlier. focus near enough to see and hear them. "I. most of them folded and stacked, a refreshment stand that sold orange juice and coffee, and a great. "Oh, my nearest and dearest friend," said the grey man, "I had almost forgotten you. Forgive me." He took from his pocket an envelope, and from the envelope he took a large, fluttering moth. "This flew in my window last night," he said. The wings were pale blue, with brown bands on the edges, and the undersides were flecked with spots of gold. He pushed in a long metal flap at the side of the trunk, very like a mail slot, and slid the moth inside. But whenever dusk began, the girl Hinda would go to the edge of the clearing and call out in a high, sweet voice: Tuesday, and do you suppose in all that time that the audience has ever voted for me to be Miss. automatic machinery. "was designed to contain beings who are no more adapted to this Mars than we are. They need warmth, oxygen at fairly high pressures, and free water. It isn't here now, but it can be created by properly designed plants. They engineered these plants to be triggered by the first signs of free water and to start building places for them to live while they waited for full summer to come. When it does, this whole planet will bloom. Then we can step outside without wearing suits or carrying airberries." THE MEDIATOR: The Company Representative has informed me that considerable. He smiled faintly. "I didn't know much about anything then. Too many people were already dead. If. The scene outside was deceptively quiet as Colman lifted a flap and peered out, keeping his head well back from the edge of the canopy. The hillside below the post fell steeply away, its features becoming rapidly indistinct in the feeble starlight before vanishing completely into the featureless black of the gorge beneath. There was no moon, and the sky was clear as crystal. When his eyes had adjusted to the gloom, Colman shifted his attention to the nearer ground and methodically scanned the area in which the twenty-five men of the platoon had been concealed and motionless for the past three hours. If they had undercut their foxholes and weapons pits the way he had shown them and made proper use of the rocks and vegetation, they would stand a good chance of escaping detection. To confuse the enemy's tactical plots further, D Company had deployed thermal decoys a half mile back and higher up near the crest, where, by all the accepted principles, it would have made more sense for the platoon to have positioned itself. Auto timed to turn on and off in a random sequence to simulate movement, the decoys had been drawing sporadic fire for much of the night while the platoon had drawn none, which seemed to say something about the value of "the book" as rewritten by Staff Sergeant Colman. "There are two ways to do anything," he told the recruits. "The Army way and the wrong way. There isn't any other way. So when I tell you to do something the Army way, what does it mean? / Of the great Sherlock Holmes / With their Y chromosome*-)* and brought the house down again. But you may, by now, be asking yourself, "What's a clone?" It's been in the news a great deal lately, but recognizing a word and knowing what it represents can be two different things. So let's go into the matter-The word "clone" is Greek, exactly as it stands, provided you spell it in Greek letters, and it means "twig." They'd leave spores behind them as they retreated, distributing them all through the soil. That way, if the upper ones blew away or were sterilized by the ultraviolet, the ones just below them would still thrive when the right conditions returned. He glanced from side to side to take in the whole of his audience. "I, ah--I almost didn't make it here at all." He paused, and the last whispers of conversation died away. "A sign in the hall outside says that the fossil display is in twelve-oh-three upstairs." The American Archeological Society was holding its annual convention in the Hilton complex that week. Congreve shrugged "I figured that had to be where I was supposed to go. Luckily I bumped into Matt on the way, and he got me back on the right track." A ripple of laughter wavered in the darkness, punctuated by a few shouts of protest from some of the tables. He waited for silence, then continued in a less flippant voice. "The first thing I have to do is thank everybody here, and all the NASDO people who couldn't be with us tonight, for inviting me. Also, of course, I have to

express my sincere appreciation for this, and even more my appreciation for the sentiments that it signifies. Thank you--all of you."
