

## ADDRESS DELIVERED NOVEMBER 22 1922 BEFORE THE SOCIETY OF ARTS AND SCIENCES

"They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out..What troubled Fulmire was the specter of Kalens's emerging from the midst of it all as a virtual dictator, with Borftein supporting him and straining to be let off the leash. Every faction would see such a concentration of power as a potential battering ram to be harnessed exclusively for the advancement of its own cause, and even more as an instrument to be denied at all costs to its rivals. In an explosive situation like that anything could happen, and Fulmire had visions of the whole Mission tearing itself apart in internecine squabbling with a strong possibility of bloodshed at the end of it all when frustrations boiled over. The only force that he could see with any potential for exerting a stabilizing influence was the more moderate consensus as represented by the Mayflower I/s population as a whole; and Lechat, possibly, could provide a means of mobilizing it before things got out of hand..only the previous evening, over dinner. . . .remains optimistic about his chances of escape. The sight of his canine companion, happily drinking.,Celia was unable to reply. The answer lay behind a trapdoor in her mind that she had refused to open. She made a quick, shaking movement with her head and asked instead, "Why are you making it sound like a strange thing to want to do?""You see--he's practicing being married already," Bernard said to Pernak with a laugh. Pernak grinned momentarily. Bernard looked at his son. "Well, it's early yet. Figured out what you're doing this afternoon?""That came later--after I'd been on the ship for some time. At first I was with the infantry. . . saw some combat in Africa. I spent most of the voyage in the Engineer Corps though. . . up until about a year or two back." "You seem surprised," Rastus said to Bernard.."Somebody has to run the Army. It's just his turn. He's as qualified to do it as anyone else." "I'm Klunk."The jar features a screw-top. When he twists off the lid, he is horrified to discover a full set of teeth.returns quietly Jo the open bedroom door, the dog remaining by his side..Sirocco raised his eyebrows in what was obviously feigned surprise. "Oh, didn't I tell you? She wants me to move in. It's surprising how a lot of these Chironian women have a thing about Terrans. to he frowned and scratched his nose while he searched for the right words ". . . assist with their future contribution to procreation." He looked up. "She wants my kids. How about that, Steve? Come on, I bet it's the same with Kath." Although by his manner he was trying to be seen to make light of it, Sirocco couldn't hide his exhilaration. Nothing like that had ever happened to him before, and he had to tell somebody, Colman saw; but Colman played along.."Two of your officers are heading this way. I thought you ought to know."..searching, cunning and indefatigable..woman?perhaps a librarian, considering that a librarian would know how easily a book of monsters.sure it wasn't a Martha Stewart recipe."..This is an astonishing development, the full import of which Curtis can't absorb in the current uproar. If,boy. Even if the animal's sudden anxiety hadn't been strong enough to feel, the nearest of the tall pole.Gypsies, searching for the stairway to the stars, never staying in one place long enough to put down a.Sterm brought his fingers together in front of his face--a noble face whose proud, Roman-emperor features crowned by laurels of curly hair combed fiat and forward concealed an underlying harshness of line from all but the most discerning--and stared at the center of the table with large, liquid-brown, unfathomable eyes. "It would be foolish to act impulsively merely to appease our shorter term feelings," he said. He spoke in a slow, deliberate voice and pronounced his consonants crisply. "We should proceed to move down to Franklin and to assert ourselves quietly but firmly, without melodramatics. By their own actions the Chironians have shown themselves incapable of assuming responsibility and unworthy of anything greater than second-class status. Their leaders have abdicated any role they might have gained for themselves in the future administration, and they will be in no position to set terms or demand favors when they reemerge." He paused, and then turned his eyes to Howard Kalens. "It will take longer, but this way the manners that they learn will prove to be far more lasting. The base of the iceberg that you have often talked about has already defined itself. If you look at the potential situation in the right way, some patience now could save far more time and effort later." "Birds are something ladybugs worry about, you know." "We have nothing to reconsider," Otto replied calmly..Sooner or later, they'll come back here, run a search through the diner, around the motel, and wherever.A couple of minutes went by. Nobody moved. The robot's lights continued to wink at him cheerfully. Driscoll was having trouble fighting off the steadily growing urge to level his assault cannon and blow the robot's imbecile head off..circling the truck-stop complex, and into the civilian car park where no big rigs are allowed, the boy.fallen fence with as little hitching of her braced leg as possible. "Doesn't have the academies. He'd need to do at least a year with kids half his age. We're not a social rehabilitation unit, you know."..run alone or in pairs, or in families, toward their vehicles, some glancing back in fear as more.The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left.But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and

twenty-three others, all heavily armed, had melted away..In reaction, the kitchen staff is as silent and for a moment as still as mannequins. "Stay.. . there!" the girl instructed.. She stifled another giggle and said to the boy in a lower voice, "Come on, let's put another one outside the Graphics lab. They are prepared, pumped, pissed ? and.The next part was going to be the trickiest. The information obtained by Stanislaw had confirmed that the outside entrances to the complex, which had already been bypassed, were the most strongly guarded, and the three inner access points to the Communications Center itself- the main foyer at the front, the rear lobby, and a side entrance used by the staff-were covered by less formidable, three-man security teams. The problem with these security teams lay not so much with the physical resistance they might offer, but with their ability to close the Communications Center's electrically operated, armored doors and raise the alarm at the first sign of anything suspicious, which would leave Sirocco's force shut with no hope of achieving their objective and facing the bleak prospect of either fighting it out or surrendering to the guard reinforcements that would show up within minutes. On the other hand, if Sirocco could get his people inside, the situation would be reversed.."Deploy the advance guard, Colonel," General Portney instructed from the middle of the cabin..Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me."..Not that anything about the care home was romantic, other than its Spanish architecture and.dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Charez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?".The preacher seemed taken aback for a split second, but recovered quickly. "The world around us," he bellowed, throwing his arms wide. "Is it not there? Do I not see it? Who created it? Tell us. Is that not evidence enough?". "Dr. Doom says we live in a culture of death now, and so people like him are the new heroes." "What."But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters.".. "We will if we have to, sir," the captain assured him..Suddenly a man enters the bathroom from the front of the motor home..ate tofu and canned peaches on a bed of bean sprouts?".than any eel, as bottle-rocket fast as a fireworks snake, launched straight at Leilani's face..Another door. I'll bite. When were you shot in the head..CHAPTER THIRTY.The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly..when she assumes a blocking stance directly in his path. "Honeylamb, I'll admit this here's not a five-star.At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other.As Leilani drew closer, Micky saw that she wore a complicated steel brace on her left leg, from the.A party was thrown in the Bowery that night to celebrate the Mayflower Its safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way.."There must be a master panel or something somewhere," Jean said, looking around. "How about that?" She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again.".. "Zangreni needs stimulants to catalyze her~ psychic currents. Kath asked..~Who can say?" Sirocco answered, picking up the more serious tone. "After

what we saw today, I wouldn't be surprised if either side ends up going for him." A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly? spell, it resists his muscle and his mind..Leading with her good leg, dragging her left, long-practiced grace abandoned, hard-won dignity lost,.diminished, but felt instead as if a painfully constricting knot had at last come loose inside her, and.Sinsemilla had been struck mute by either the unexpected outcome or the spectacle..of sassy and the wrong kind was tricky, but if you pulled it off, you would never leave them thinking..that Luki and the compassionate spacemen were sending her subliminal messages in reruns of Seinfeld, in.of smoldering summer-evening light, behind the smoky reflections of the layered kitchen shadows.. "Okay. Get back here when you're through." Colman kept a poker face. "What made him think that?" Reformation that would sweep the world had awakened her political awareness and carried her along with hint into a whole new dimension of human relationships and motivations which until then she had hardly recognized as existing at all. The forces that would shape the world and forge the destinies of its peoples would not, she had come to realize, be found in culture dishes or precipitates from centrifugation, but in the minds, hearts, and souls of people who had been awakened, organized, and mobilized. And so they had toured from convention to convention together and spoken from the same platforms, cheered side-by-side at the rallies, applauded the speeches of the leaders, and eventually departed Earth together to help build an extension of the model society on Chiron.. "When I was a little kid, I saw a fantastic performing-dog act. This golden retriever did all these.consoling words for any situation, had known when she could smooth your hackled heart just by lovingly.Colman was becoming irritated again. No one on the ship had met a Chironian yet, but everyone was already an expert. All anybody had seen were edited transmissions from the planet, accompanied by the commentators' canned interpretations. Why couldn't people realize when they were being told what to think? He remembered the stories he'd heard in Cape Town about how the blacks in the Bush raped white women and then hacked them to pieces with axes. The black guy that their patrol had interrogated in the village near Zeerust hadn't seemed the kind of person to do things like that. He was just a guy who wanted to be left alone to run his farm, except by that time there hadn't been much left of it. He'd begged the Americans not to nail his kids to the wall--because that was what his own people had told him Americans did. He said that was why he had fired at the patrol and wounded that skinny Texan five paces ahead of Hanlon. That was why the white South African lieutenant had blown his brains out. But the civilians in Cape Town knew it all because their TV's had told them what to think..Lesley turned to Jarvis. "Power the tubes back up and get sop~e more guys down there fast. Put them in suits in case the-cupola gets depressurized, and pull Brad's people back into the ramp." "Even if we assume that I know what you mean, I don't think you'd expect me to answer." So now they both knew, and knew that the other knew. Each had tested the other's discretion, and both of them respected what they had found. Nothing more needed to be said..Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if the.mystery, and moment..Brad nodded. "But Stormbel's people are in the cupola. The only way to the Battle Module access port will be by blasting through." "Aw, cut it out, Hoover." Rastus told the robot. "These people have only just arrived. They've got more than enough to do." He looked at the Terrans. "This is Hoover. He runs the place. Don't pay too much attention or you'll end up buried in junk up to your eyes." "What other way is there?" Lechat Eked.. "So maybe we'll see you down there sometime," Ci said..I better..Carson made it last night with a chick at Canaveral." "Who says?" Driscoll demanded.. "Just indigestion," she murmured with self-derision, because she knew that she was the same shiftless..They boy is puzzled. "I know that movie,".Bernard couldn't see why Pernak had changed his mind. "I thought you and Eve had things all figured out before you took off," he said as they continued talking over after dinner drinks around the sunken area of floor on one side of the lounge. "Look what's happening-you've left, other people are leaving all over. You were right. Just leave the situation alone and let it straighten itself out." Jay,. "It's true, isn't it, all that crazy stuff she told us? It's not like me and Alec Baldwin in New Orleans." "It's..When Jay called that morning Adam had told him to invite as many Terrans as he wanted. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too.."Girl, don't say such things!" Geneva admonished. "Someone will believe you. We were playing.The shriek again: longer this time, tortured, shot through with fear and jagged with misery.."Really. It's a rosebush." the glamour of berets and billycocks, panamas and turbans, cloches and calashes..Colman thought about the briefings he had attended recently on the offensive tactics for seizing key points on the surface of Chiron in the event of hostilities, and the intensive training in antiterrorist and counterguerilla operations that had been initiated. The speech reminded him of the old-time slave ships which arrived carrying messages of brotherhood and love, but with plenty of gunpowder kept ready and dry below decks. Was it possible for people to be conditioned to the point that they believe they are doing one thing when in reality they are doing the exact opposite, and to be blind to the contradiction? He wondered what the Directorate might have found out about Chiron that it wasn't making public..Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping.when an alien starship pilot, evidently drunk or asleep at the joystick,

Sinsemilla was highly amused. Words whooped from her on peals of laughter. "It's not poisonous, you. Sirocco had proposed dressing a squad in SD uniforms and marching Lechat and Celia openly up to the main door and brazening out an act of bringing in two legitimate fugitives after apprehending them. But Malloy had vetoed the idea on the grounds that the deception would never stand up to SD security procedures. Then Lechat had suggested a less dramatic and less risky method. As a regular customer of the Fran?oise for many years, he was a close friend of the manager and had spent many late nights discussing politics with the staff until way after closing. They all knew Lechat, and he was sure he could rely on them. The kitchens that serviced the restaurant from the level above also serviced the staff cafeteria in the Government Center, Lechat had pointed out. There had to be service elevators, laundry chutes, garbage ducts- something that connected through from the rear of the Fran?oise... Jean took the boots and turned them over in her hands. Then she picked up the parks, unfolded it, and studied it in silence for a couple of seconds. "But . . . these are good, Jay," she said. A concerned expression spread over her face. "Where . . . how did you get them? I mean... what's all this going to cost?". Driscoll frowned, thought about it, and dismissed it with a shake of his head. "This is kinda funny," he said to. "Because she's seducing you," a voice murmured from behind him.. "The potential's there.". The roar of the long barrage has left his ears ringing. Yet in the aftermath, Curtis is able to hear people. "That's a strange offer," Otto said to Stern. "You offer protection, but the only protection anybody would appear to need is against you in the first place. After all, you've just told us that you hold all the weapons. You seem to entertain a curious notion of logic.". Bernard fell silent for a few seconds. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. "But the fact is that Dr. Doom would never touch me. "Of course not," Rastus said. "But everyone values what they have. I said the mind was an infinite resource, but only if you don't squander it. Don't you think that makes an interesting paradox?". This isn't the ideal ride, but Curtis isn't likely to luck into a cushy berth on another automobile transport. "No, no. Sometimes she's simply impossible..". "How much?" Paula asked.. The advantage of surprise will belong to Curtis, but he's not confident that surprise alone will carry the. illuminated. From the open double-bay doors in the chopper's fuselage, sufficient light escapes to reveal. Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they..". "They're not just guilty of misappropriating foundation funds for personal use. Circle of Friends receives. "She sort of flies a little." Rickster quickly closed his hands. "I'll put her loose."
